Homework 4: Setting up LISP in Github Classroom.

1. Create a Github account if you do not have one.
2. watch this 8-minute video:
   https://mediaspace.minnstate.edu/media/Sarnath%20Ramnath's%20Personal%20Meeting%20Room/1_6ksfrgqw
3. Following the instructions in the video, set up your codespace and make sure everything is working properly.
4. Upload the program files that you created for questions in Homework 3.
5. Compile and test the code, and generate a script file.

Linux commands given in video:

curl -L http://prdownloads.sourceforge.net/sbcl/sbcl-1.4.3-x86-linux-binary.tar.bz2 --out out.tar.bz2

bzip2 -cd out.tar.bz2 | tar xvf -

cd sbcl-1.4.3-x86-linux/

sudo ./install.sh
